PROFESSIONAL SUMMARY

Results-driven Full-Stack MERN Developer and CS student with expertise in architecting scalable web applications and AI-integrated systems. Proficient in React.js, Node.js, and Generative AI (LLMs). Demonstrated success in optimizing system performance by 30% and delivering user-centric solutions. Strong technical foundation in Data Structures (DSA), RESTful Microservices, and Database Management.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++, Python, SQL, HTML5/CSS3
Frontend: React.js, Tailwind CSS, Vite, Responsive Web Design
Backend: Node.js, Express.js, REST APIs
Database: MongoDB, MySQL
Tools: Git, GitHub, Postman, Linux, Vercel
Core Computer Science: Data Structures & Algorithms, OOPs, DBMS, Operating Systems

TECHNICAL PROJECTS

EMI Pro – Smart Loan Planner | *React.js, Tailwind CSS, Vite, Recharts* | [GitHub](#)

- Built and deployed a production-ready fintech application enabling real-time EMI calculations, loan comparison, and repayment analysis.
- Implemented advanced financial features including amortization schedules, prepayment savings estimation, interactive charts, and loan eligibility assessment.
- Integrated PDF/Excel export, calculation history using LocalStorage, dark mode support, and a fully responsive mobile-first user interface.

FarmScan – AI Crop Diagnostic System | *React, Node.js, TensorFlow* | [GitHub](#)

- Integrated a Deep Learning (CNN) model via Flask API to detect 38 crop diseases with a documented 94% success rate.
- Developed a full-stack analytic dashboard with real-time weather integration to support predictive agricultural decision-making.
- Implemented JWT-based Authentication protocols and encrypted API endpoints to ensure 100% user data integrity.
- Designed a scalable NoSQL Schema in MongoDB, improving diagnostic history retrieval speed by 15%.

SakhiSetu – AI-Driven Government Navigator | *MERN, FastAPI* | [GitHub](#)

- Engineered a Retrieval-Augmented Generation (RAG) chatbot using Gemini API, achieving 92% accuracy in handling natural language queries.
- Architected a Multilingual Engine for 10+ regional languages, resulting in a 40% increase in accessibility for diverse user bases.
- Streamlined data synchronization by deploying an automated pipeline with Playwright, reducing manual data updates by 100%.
- Optimized backend response times by 25% through strategic SQLite indexing and query optimization.

EDUCATION

Dayananda Sagar College of Engineering

Bachelor of Engineering in Computer Science and Engineering;

Bengaluru, KA

2023 – 2027

Sarvajna PU College

Pre-University (PCMB); Percentage: 93.23%

Kalburgi, KA

2021 – 2023

CERTIFICATIONS & TECHNICAL ACHIEVEMENTS

Certifications: Full-Stack Web Development (freeCodeCamp), DSA (Coursera), C++ (Infosys)
Competitive Programming: Solved 200+ algorithmic challenges on LeetCode and CodeChef.
Competencies: Agile Methodology, Technical Documentation, API Schema Design, Scalable Systems
Languages: English (Fluent), Hindi, Kannada, Marathi
